

# No Heart Disease Detected

No significant indicators of heart disease found based on the provided data.

7.45%

Probability of Heart Disease

Risk Level: Low

 **Diagnosis Summary**

| Model Used  | Logistic Regression |
|-------------|---------------------|
| Prediction  | Negative            |
| Probability | 7.45%               |
| Risk Level  | Low                 |

 **Recommendation**

Maintain healthy lifestyle habits. Regular check-ups every 1–2 years recommended for prevention.

 Patient Input Parameters

|                 |                     |
|-----------------|---------------------|
| AGE             | SEX                 |
| 21.0 yrs        | 1.0                 |
| CHEST PAIN TYPE | BLOOD PRESSURE      |
| 1.0             | 120.0 mmHg          |
| CHOLESTEROL     | FASTING BLOOD SUGAR |
| 230.0 mg/dl     | 0.0                 |
| RESTING ECG     | MAX HEART RATE      |
| 1.0             | 140.0 bpm           |
| EXERCISE ANGINA | ST DEPRESSION       |
| 0.0             | 1.1                 |
| ST SLOPE        | MAJOR VESSELS       |
| 1.0             | 1.0                 |
| THALASSEMIA     |                     |
| 1.0             |                     |
